PRODUCT REQUIREMENT DOCUMENT(PRD)

1. Context

We know the life of delivery partners are challenging some days when they do not get sufficient money through the deliveries they are serving. The hardworking delivery agents are really the backbone of our blinzedu's success so we need to help them in order to sustain in the market in the long run. When we implement tipping feature in our app we can provide extra income to the delivery partners that leads to the stakeholder relationship at blinzedu. We can introduce this tipping feature to increase customer satisfaction as the delivery partners tend to make sure the customer is satisfied to provide him with a tip.Now we will break down this feature and study competitive analysis of this feature in this document to make sure we implement tipping successfully at blinzedu.

Heading text	Thank your delivery partner with a tip	Say thanks with a tip	Delivery partner tip	Tip your delivery partner
Sub label	This amount will be credited to the partner's tip jar.	You’ve made their day! 100% of the tip amount will be passed on to your delivery partner.	The entire amount will be sent to your delivery partner.	Your kindness means a lot! 100% of your tip goes directly to your delivery partner.
Emoji beside the suggested amount	✅	❌	✅	✅
Provided Custom option	✅	✅	✅	✅

2.3 Recommendations

- Add a minimum tip amount of 10 rupees as it can provide minimum support to the delivery partner.
- Add the label of most tipped to the 20 rupees as it can create empathy for customers to tip 20 rupees instead of tipping a minimum amount of 10 rupees as tip.
- Consider putting the tipping feature section above the billing because after seeing the total bill amount the customer is reluctant to add more to the bill.
- Add a nice heading text using words like thanking the delivery partner to make the customers feel happy to tip the delivery partners.
- Add a nice sub heading that guarantees the amount the customer tips will be directly credited to the delivery partner to make sure the customer is feeling safe to tip the delivery partner.

3.Customer experience

Feature	CX	Technical acceptance criteria	Wireframe
Tip amount options	Users can choose a tip amount on the checkout page Users should be able to view emojis of their emotions(smiles) when the tip amount is higher the more excited the emoji is.	All configured tip amounts should be in ascending order of the amount. Tip amounts and corresponding emojis should be backend configurable. The UI should work in top 25 andriod devices and top 5 ios devices. The section should appear between the “coupon code” and “payment billing” section.	Custom tip amount	For users who have exceptional experience, they can add custom tip outside of predefined amounts. Ability to add the tip amount.	Maximum custom tip amount should not exceed 999. If a user chooses maximum above this show an error message. Tapping on a custom tip should convert the custom tip section to the input number box. Keyboard should open automatically once the user chooses the custom tip.	Most tipped amount label	For users who wanted to tip the minimum amount to the delivery partner, the label of most tipped amount makes them feel free to donate the slight higher amount. Users can decide the tip amount they wanted to denote easily.	The label should be given to the most tipped amount except the 1st minimum tip amount. It should be labelled with green colour.	check box of add this tip amount to the future orders	For users who wanted to donate tip amount to every order this feature enables them to donate the same tip amount every time. It reduces the time for billing as well as customers donates to delivery partners for a good cause.	The check box should be at the bottom of the tip amount feature section. If the checkbox is clicked the tip amount should be the constant tip amount for future orders for that customer.	Highlighting the selected tip amount	For users it is aware of which tip amount the user selected. Users can easily select and unselect at the same place.	The selected tip amount should be highlighted and the tip amount should be added to the payment billing directly. Should be able to highlight and unhighlight at any time.	

4.Success Metrics
